

# 0.4mm Contact Pitch, 1.5mm above the board, Board-to-Board / Board-to-FPC Connectors

## DF18 Series

### ■ Features

#### 1. Allows higher mounting density of board components

Extremely small board mounting pattern and low above-the-board profile makes the connector suitable for small device applications.

#### 2. High Contact Reliability

Despite its small size and low profile the contacts have large deflection distance, guaranteeing reliable electrical performance.

#### 3. Good Mating Characteristics

Large lead-in distance of 0.33 mm in horizontal directions and tactile "click" confirms fully mated condition of connectors.

#### 4. Optional Additional Board Retention

For applications requiring extra-strong hold of connectors to the board connectors can be ordered with optional metal hold-down.

#### 5. Automatic Board Placement

Connectors have large flat width (Plug: 1.4 mm, Receptacle: 1.44mm) to accommodate pick-up with automatic placement machines.

### ■ Applications

Digital video cameras, Digital still cameras, cellular phones, miniature displays, cameras portable equipment and other applications requiring small reliable board-to-board and FPC-to-Board connections.

#### Low profile – Board-to-board distance of 1.5 mm

#### High Contact Reliability – Effective connection wipe of 0.4 mm

#### Self-alignment distance: 0.33 mm

DF18 Series 0.4mm Contact Pitch, 1.5mm above the board, Board-to-Board / Board-to-FPC Connectors

Product Specifications

Rating	Current rating	0.3A	Operating temperature range	-35℃ to +85℃ (Note 1)	Storage temperature range	-10℃ to +60℃ (Note 2)
	Voltage rating	30V AC	Operating humidity range	40% to 80% (Note 2)	Storage humidity range	40% to 70% (Note 2)

Item	Specification	Condition
1. Insulation resistance	50 M ohms min.	100 V DC
2. Withstanding voltage	No flashover or insulation breakdown.	100 V AC / one minute
3. Contact resistance	60 m ohms max.	1 mA AC, 20mv max., 1KHz
4. Vibration	No electrical discontinuity of 1 ms or more.	Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours / 3 axis.
5. Humidity	Contact resistance: 60 m ohms max. Insulation resistance: 25 M ohms min.	96 hours at temperature of 40 ± 2℃ and humidity of 90 to 95%
6. Temperature cycle	Contact resistance: 60 m ohms max. Insulation resistance: 50 M ohms min.	Temperature : -55℃ → +15℃ to +35℃ → +85℃ → +15℃ to 35℃ Duration : 30 → 2 to 3 → 30 → 2 to 3 (Minutes) 5 cycles
7. Durability (insertion/ withdrawal)	Contact resistance: 60 m ohms max.	50cycles
8. Resistance to soldering heat	No deformation of any component. No affect on contacts.	Reflow: At the recommended temperature profile Manual soldering: 350℃ for 3 seconds

Note 1: Includes temperature rise caused by current flow.  
 Note 2: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non-conducting condition of installed connectors in storage, shipment or during transportation.  
 Note 3: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

Order by the number of reels.

## Plugs (with metal hold-down terminals)

## PCB mounting pattern

Note 1: The terminals located at each of the 4 corners provide additional hold to the board's mounting surface and are not part of electrical connection.

When counting the terminal leads the number of actual electrical circuits is lower by 4. Example: Connector with 24 terminal leads will have 20 actual electrical connections when mated with corresponding part.

Note 2: Please note that mounting of parts within the area of the broken lines will prevent the connector from mating.

D: When the corresponding connector is DF18B-0.4V (\*\*)

E: When the corresponding connector is DF18C-0.4V (\*\*)

Note: Bottom side feed holes are added to embossed tape when  $F = 32.0$  or greater.

DF16 Series 0.4mm Contact Pitch, 1.5mm above the board, Board-to-Board / Board-to-PC Connectors

◆ Usage Recommendations

1.Recommended Temperature Profile (SMT)

Note1: UP to 2 cycles of Reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle  
 Note2: The temperature profile indicates the board surface temperature at the point of contacts with the connector terminals.

2. Recommended soldering conditions	Soldering temperature: 350°C, soldering time: within 3 sec.
3. Recommended screen thickness and open area ratio (Pattern area ratio)	Thickness: 0.12 mm
4. Board warping	Maximum of 0.02mm at the connector center section, with both ends of the connector as reference points.
5. Cleaning conditions	Refer to "Nylon Connector Use Handbook".
6. Precautions	<div> <div>■</div> <div>Excessive twisting when mating/un-mating may cause damage to the connectors.</div> </div> <div> <div>■</div> <div>Specify receptacles with the metal hold-down when connecting rigid (non- flexible) printed circuit boards.</div> </div>
